

## ELLIPSIS

SPACE dot, SPACE dot, SPACE dot  
is what I always thought (and was taught)  
an ellipsis is . . .

look at all that real estate.

Not like when Colbert repeats  
the President's tweets:

Dot dot dot, dot dot dot dot.....dot dot dot.

But with spaces, too--  
a way more luxurious way  
which gives us all more time to  
consider with our reason'd minds  
if there's a right way to go forward or back

Not as if in an afterthought  
or what a comma would say

But over time, like in the real world usually takes
